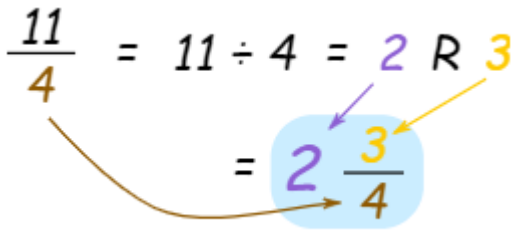
12.1.2021 (Tuesday) – L.I. Can I convert improper to mixed fractions?

Improper to mixed fractions:



1. Divide the numerator by the denominator.
2. Write down the whole number answer
3. Then write down any remainder above the denominator.

1. Ring or write down any mixed number that is equivalent to the improper fraction.

$\frac{13}{3}$	$2\frac{2}{3}$	$4\frac{1}{3}$	$5\frac{1}{3}$	$4\frac{2}{3}$	$2\frac{2}{3}$
$\frac{14}{4}$	$3\frac{2}{4}$	$4\frac{1}{2}$	$3\frac{1}{2}$	$4\frac{1}{4}$	$2\frac{1}{2}$
$\frac{16}{10}$	$1\frac{4}{10}$	$1\frac{2}{5}$	$1\frac{3}{5}$	$1\frac{6}{10}$	$1\frac{8}{10}$
$\frac{20}{6}$	$2\frac{2}{3}$	$3\frac{2}{6}$	$3\frac{2}{3}$	$2\frac{1}{3}$	$3\frac{1}{3}$
$\frac{19}{5}$	$4\frac{1}{5}$	$4\frac{2}{5}$	$3\frac{4}{5}$	$3\frac{3}{5}$	$5\frac{1}{5}$

2. Write the following improper fractions as mixed number.

a. $\frac{22}{3}$ = _____

b. $\frac{5}{2}$ = _____

c. $\frac{21}{6}$ = _____

f. $\frac{14}{5}$ = _____

g. $\frac{16}{3}$ = _____

h. $\frac{17}{8}$ = _____

k. $\frac{23}{10}$ = _____

l. $\frac{19}{4}$ = _____

m. $\frac{19}{7}$ = _____
