Can you solve these subtraction stories?

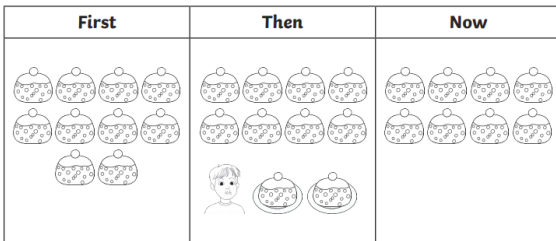

Use *first, then, now* to tell simple maths stories to practice subtracting in real life

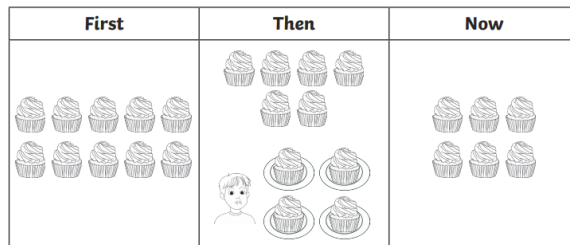

$$\square - \square = \square$$

$$\square - \square = \square$$

$$\square - \square = \square$$

$$\square - \square = \square$$

Now use this template to try some of your own. You could draw your own grid, use real objects at home and then try using your own jottings (drawings).

First	Then	Now

$$\square - \square = \square$$
