Can I sort 3D shapes?

Choose 3D shapes at home to sort.

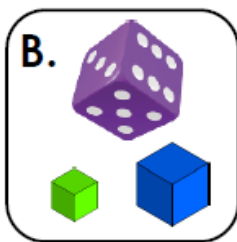

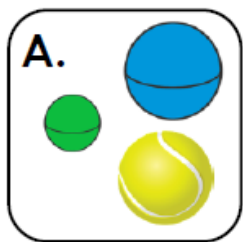

Think of as many different ways to sort as you can.

You could sort by colour, properties, if they roll or number of edges. You could also choose objects to sort outside and learn through the outdoors!

Challenge:

9b. Match the labels to the groups.

Cubes

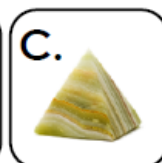

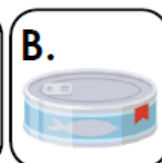

Cones

Spheres

Cylinder

11b. Sort the shapes into the table.

Pyramid	Cube	Cylinder	Cone
