Year 4 – Term 5

I know the multiplication facts for the 12 times table.

By the end of this half term, children should know the following facts. The aim is for them to recall these facts instantly.

```
 1 x 12 =  12
 2 x 12 =  24
 3 x 12 =  36
 4 x 12 =  48
 5 x 12 =  60
 6 x 12 =  72
 7 x 12 =  84
 8 x 12 =  96
 9 x 12 = 108
10 x 12 = 120
11 x 12 = 132
12 x 12 = 144
```

Top Tips

The secret to success is practising little and often. Use time wisely. Can you practise these KIRFs while walking to school or during a car journey?

You don't need to practise them all at once: - perhaps you could have a fact family of the day. If you would like more ideas, please speak to your child's teacher.

Double your 6 times table – Multiplying a number by 12 is the same as multiplying by 6 and then doubling the answer.

$7 \times 6 = 42$

Double 42 is 84

so, $7 \times 12 = 84$
